

28MM HANDHELD SEAM ROLLER

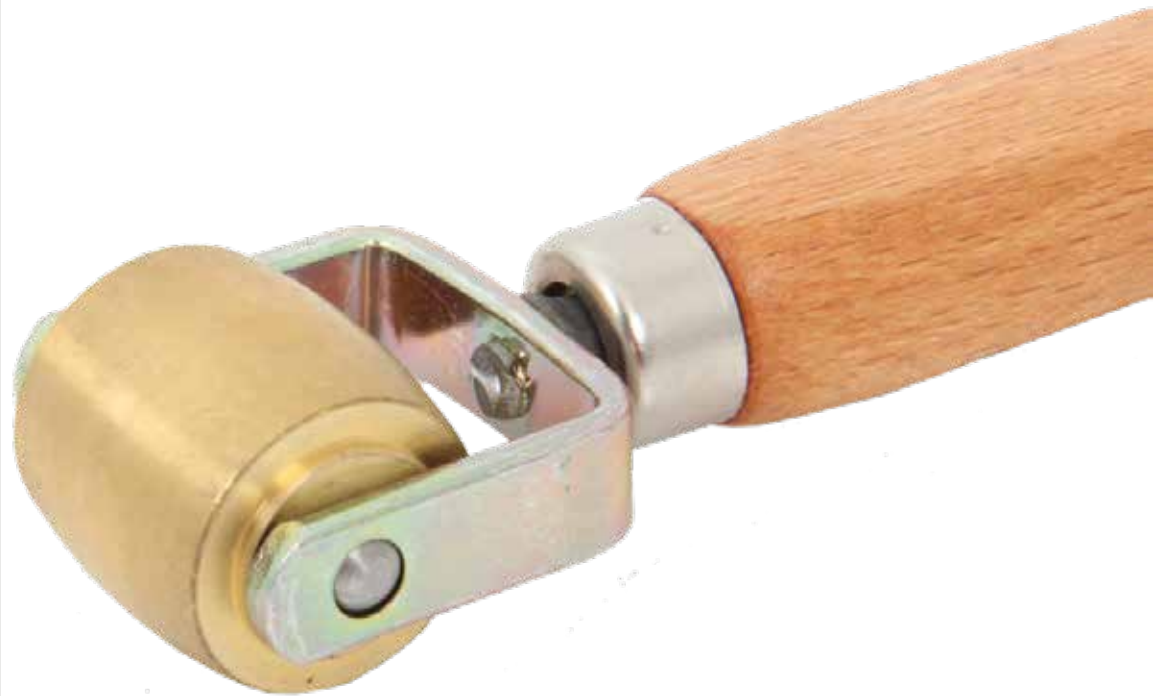

The Northern Diver 28mm (1.1") Brass Seam Roller is an essential tool for drysuit manufacture, maintenance and repairs. Designed to apply even pressure across glued seams, seam tape and bonded components, it helps create strong, reliable waterproof seals by improving adhesive contact and reducing trapped air.

The solid brass roller provides consistent, controlled pressure, while the 28mm (1.1") wheel offers excellent precision when working on curved seams, latex wrist and neck seals, boots and other detailed areas.

Ideal for use on drysuits, wetsuits, neoprene equipment, dry bags and inflatables, the Seam Roller is equally suited to recreational divers, commercial diving contractors, military dive units, dive centres and professional repair workshops. Durable, corrosion-resistant and easy to clean, it's an essential addition to any dive maintenance toolkit.

FEATURES

- 110mm (4.3") wooden handle
- 28mm (1.1") roller
- Applies even pressure to glued seams and seam tape
- Helps improve adhesive bonding and waterproof seals
- Excellent for fitting latex neck and wrist seals
- Suitable for bonding neoprene panels and reinforcement patches
- Solid brass roller provides consistent, controlled pressure
- Corrosion-resistant and easy to clean
- 28mm wheel offers precision for curved and confined areas
- Suitable for wetsuits, dry bags, inflatables and technical fabrics.

DESCRIPTION
