

# 60M RESCUE BACKPACK WITH REFLECTIVE FLOATING LINE

The Rescue Backpack comes complete with 10mm (0.4") thick technical polypropylene (PP) rope, available in 60m (197') or 100m (328') lengths, designed specifically for water rescue operations.

## BACKPACK FEATURES

- Durable construction: made from ultra-tough, nylon-lined 1000 denier rip-stop Cordura® for maximum longevity.
- Comfortable & adjustable: padded, fully adjustable carrying straps for easy transport.
- Size & colour options:
  - 60m (197') version: slightly smaller, black/yellow.
  - 100m (328') version: black/ blue.
- High visibility: narrow reflective piping stitched into seams and high-visibility reflective bands at the top and bottom.
- Safety labels: printed on the back and neck of the backpack.
- Quick access: drawstring neck closure allows rapid access to contents in emergencies.
- Attachment points: anchor point at the bottom, quick-clip clean line attachment, and an interior stainless steel D-ring for rope attachment.

## ROPE FEATURES

- Technical rescue reflective PP line: 10mm (0.4") thick, yellow with silver reflective threads.
- High load capacity: load-tested to 1300kg (2866lbs).
- Floating & durable: floats on water, resistant to mildew and rot, ideal for water rescue.
- Protected core: braided sheath protects the load-bearing core and contributes up to 25% of rope strength while absorbing abrasion.
- Measurement markings: pre-marked every 10m (33') for accurate measurement during rescue operations.

## CERTIFICATION

CE Approved: Certificate number EC.1282.0H140923.TZKTS97

Choose between the compact yellow 60m (197') backpack or the larger black & blue 100m (328') version to suit your operational needs.
