

EEBD & EDBA ALUMINIUM CYLINDER HOLDER

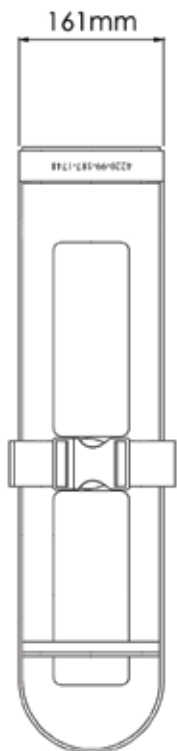

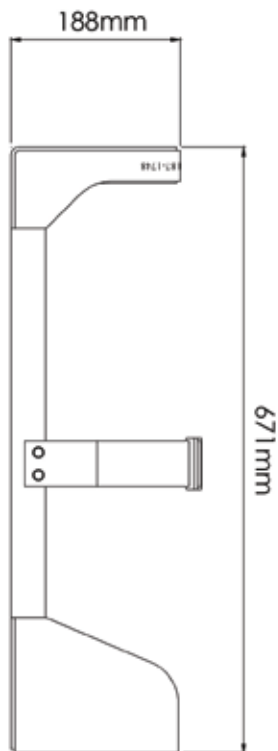

Designed to securely retain emergency breathing apparatus cylinders, the EEBD & EDBA Aluminium Cylinder Holder provides a robust and reliable storage solution for marine, offshore, defence and industrial environments.

Manufactured from lightweight, corrosion-resistant aluminium, it is designed to withstand harsh conditions while requiring minimal maintenance. An adjustable retaining strap securely holds a single cylinder in place during movement, vibration and transportation, while protective rubber padding helps prevent damage and unwanted movement.

Suitable for wall-mounted installation, the holder can be fitted inside EEBD and EDBA lockers or directly to walls, keeping life-saving breathing equipment secure, protected and immediately accessible when required.

FEATURES

- Lightweight aluminium construction for strength and durability.
- Corrosion-resistant finish suitable for marine and offshore environments.
- Adjustable retaining strap securely holds a single cylinder.
- Protective rubber padding reduces movement and prevents cylinder damage.
- Wall-mounted design for easy installation.
- Allows rapid cylinder removal during emergency situations.
- Prevents vibration and unwanted movement during transport.
- Compatible with EEBD and EDBA cylinder storage systems.
- Designed for demanding marine, offshore, defence and industrial applications.
- Helps maintain equipment readiness and emergency compliance.
