

142L ATLAS DRYBAG

A 142L heavy-duty waterproof deployment bag - the Atlas dry bag - designed for demanding operational environments, offering reliable waterproof protection, rugged durability, and high-capacity storage.

Constructed from tough 1000D TPU coated polyester with fully welded seams and a premium Aquaseal dry zip, it ensures equipment remains dry, secure, and protected in harsh conditions.

The wide, wing-shaped opening allows quick and easy access, while compression straps and multiple storage options keep contents organised during transport.
