

AQUA CLEAR SPRAY 30ML

Crystal Clear Vision, Every Dive
Nothing ruins a dive faster than a fogged-up mask. AquaClear Anti-Fog Spray is specially formulated to keep your dive mask and goggles crystal clear, allowing you to focus on the underwater world rather than constantly clearing your lenses.

For divers, snorkellers and water sports enthusiasts, AquaClear provides long-lasting anti-fog protection that performs in both warm and cold water conditions. Its advanced, non-abrasive formula helps prevent condensation without damaging your mask, making it safe for use on tempered glass, polycarbonate and coated lenses.

Simple to use and fast acting, just spray both sides of your mask lens, allow a few seconds for the formula to work, then rinse lightly with water before diving. The compact 30ml pump-action bottle fits easily into your dive bag, save-a-dive kit or travel luggage, ensuring clear vision is always within reach.

Whether you're exploring reefs, wrecks, inland dive sites or training in the pool, AquaClear helps you enjoy every dive with confidence.

FEATURES
