

COMMERCIAL DIVING HELMET LINER

Designed for maximum comfort and durability, this commercial diving helmet liner provides a cushioned interface between the diver's head and helmet, ensuring reduced pressure points and enhanced stability during extended dives.

Manufactured with a durable nylon outer shell and a soft bevelled foam inner, the liner enhances fit while preventing chafing. A reinforced 30mm webbing strap strengthens the mounting 316 stainless steel press studs, securing the liner firmly inside the helmet.

A 16-inch YKK® Aquaseal zipper allows for easy removal of the foam lining when necessary, ensuring flexibility in adjusting fit and maintenance. The top webbed loop provides a convenient drying solution, while hook Velcro tabs offer a secure attachment point for a head cushion.

Compatible with Kirby Morgan helmets and other commercial hard-hat diving systems, this helmet liner is a must-have accessory for improved fit, comfort, and safety during professional underwater operations.

FEATURES

- Durable nylon outer shell for long-lasting performance
- Bevelled foam inner lining for enhanced comfort and fit
- 316 stainless steel press studs for secure attachment
- 30mm webbing strap for reinforced mounting
- 16-inch YKK® Aquaseal zipper for removing the foam lining when needed
- Webbed loop on top for quick and efficient drying
- Hook Velcro attachment for securing a head cushion
- Compatible with commercial diving helmets, including Kirby Morgan models
