

DS420 AIR

INFLATABLE BOAT WITH AIR DECK

Our range of inflatable boats with Air Deck are the perfect partner for any type of on the water activity. Our boats are all about performance and agility, the design ensures the best possible stability and the drop stitched floor helps soften the ride.

Air Deck boats are ideally suited for the user who wants a tender that they can roll up and stow when out of use, which also combines RIB like performance thanks to the rigid air deck floor and separate inflatable keel which gives a strong 'V' profile hull.

SPECIFICATIONS

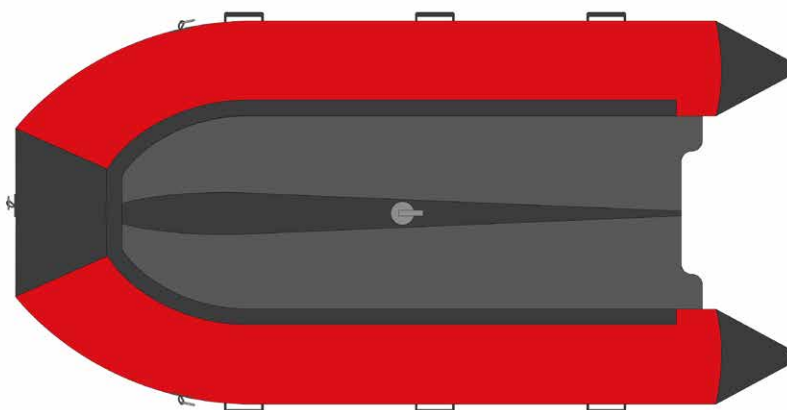

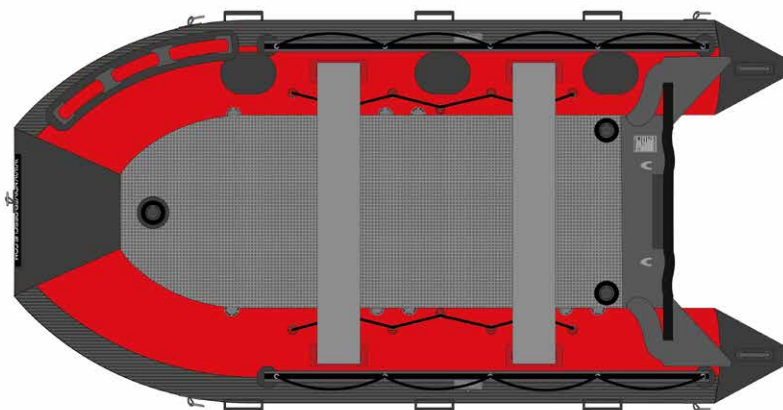

Max. loading: 1140kg (2513lbs)
Max. persons: 7
Outer dims: 420*190cm (13'8"6'2")
Internal width: 94cm (37")
Tube diameter: 48cm (18.9")
Floor detail: 8cm (3.1")
drop-stitch+PVC
Weight: 54kg (119lbs)
Chambers: 3+1 (floor)
Max. tube pressure: 0.35bar / 5psi
Max. pressure AIR floor: 0.7bar / 10psi
Handles, lines, benches: 8+2+2
Recommended outboard: 30HP max or Electric 22.4KW
Colours: red with black trim
Reinforced rubbing strakes: yes
Lifting stainless steel D-rings: yes
Transom mounted tow eyes: yes

WHAT IS AN AIR DECK?

Constructed from a high-pressure flat air deck (10psi) which is placed on top of an inflatable keel. The purpose of the inflatable keel being to give a V-shaped hull underneath the boat, which gives the boat better performance and steering then a flat-bottomed boat. The high-pressure air deck utilises drop stitch construction with thousands of individual fibres to ensure it can withstand the pressure, giving the user a rigid flat platform.

WHAT'S INCLUDED?

2x oars, hand inflation pump, storage bag, repair kit and valve fittings

DESCRIPTION

INFLATABLE BOATS

STOCK CODE

BOAT-INFLATABLE 4.2M-AIR-RED
