

DSMB

(DELAYED SURFACE MARKER BUOY)

1.3m tube style delayed surface marker buoy, featuring an over-inflation automatic dump valve (which can also be operated manually).

Incorporates a weighted opening, self-sealing base and webbing attachment strap.

Also features an inflation tube, which allows the buoy to be inflated orally or via a low pressure inflation hose.

1.3m long

Manual/auto over-inflation dump valve

Self-sealing and weighted opening

Oral/LP hose inflation tube

Attached webbing strap with stowage section (secured with hook and loop patches)
