

FRONT ENTRY RESPONDER SUIT

The Responder drysuit is made for the first responders to an incident. It is suitable for medium duty applications, such as bank searches and wading.

This suit is a popular choice for the Fire & Rescue services and other water agencies who need a reliable entry level drysuit that can be used by more than one user.

A stow-able lightweight drysuit designed for emergency rescue scenarios and available in a quick self-donning front entry option and our usual rear entry. Built with a strong coated nylon fabric the responder has fully taped internal seams and heavy-duty latex seals and socks to keep the user warm and dry in any emergency situation.

FEATURES

- Manufactured from a coated nylon fabric with fully taped internal seams

SUIT ALTERATIONS

All Northern Diver stock suits are fitted with a standard sized neck/wrist seals and boots/socks for that size suit. If the standard sizes of neck, wrist and footwear will not fit you, we can alter the suit so that it will.

CUSTOMISE YOUR SUIT

The responder suit can be printed with your team crest or any logo required. Example shows branding completed for Kinder Mountain Rescue Team.

**This drysuit is not intended for heavy duty applications.*
