

FUSION X4 310 LUMEN DIVE TORCH

The Northern Diver Fusion X4 is a high-performance underwater torch delivering 310 lumens through an advanced reflector for excellent visibility in low-light and poor-water conditions. Featuring a Philips Lumileds T 3W Luxeon LED, it produces a focused beam with a natural 5300K daylight colour temperature for accurate colour rendition underwater.

Built with a durable polycarbonate body, aluminium head and double O-ring seals, the Fusion X4 is depth-rated to 95m (312ft) and operated via an easy-to-use magnetic switch. Powered by 4 AA batteries (included), it provides up to 8.5 hours of runtime and is trusted by the UK Military for dependable performance in demanding underwater environments.

FEATURES

- High-output 310-lumen LED dive torch.
- Advanced optically enhanced reflector for superior beam performance.
- Natural 5300K daylight colour temperature.
- Philips Lumileds T 3W Luxeon LED technology.
- Up to 8.5 hours continuous runtime.
- Full output maintained for approximately 3.5 hours.
- Depth rated to 95 m (312 ft).
- Rugged polycarbonate body with aluminium head.
- External magnetic switch with double O-ring waterproof sealing.
- Trusted by the UK Military and supplied with 4 AA batteries ready for use.
- Size: 170*60*60mm (6.7*2.4*2.4")
