

RR5 INFLATABLE RAPID DEPLOYMENT RAFT

The RR5 Rapid Deployment Raft is perfect for fast-response and ice rescue. The raft surrounds one or more rescuers in an ultra buoyant and protective inflated perimeter. The RR5 allows a rescuer or rescue team to quickly reach a victim and safely retrieve them from the ice or a cold water rescue scene.

The rescuer or rescue team can easily carry the RR5 to the edge of the ice, step into the craft, and run out across the ice to reach a victim. While on the ice, they are protected from falling through a fracture into the water. In a combination ice and open water situation, the RR5 can be paddled across open water or broken ice and water by one or two rescue technicians. Perfect for rapid response ice rescue equipment and should be part of every rescue responder kit.

Features

- Fits in the boot of most vehicles
- Strong, durable and stable
- Versatile and low maintenance
- Launch without access to a boat ramp
- On scene/in action in seconds
- Available in 5 colours

Why not design your own?

We can create bespoke inflatables please contact us to discuss your requirements.

BRAND YOUR INFLATABLE

Your team crest, slogan or any other artwork can be added to your inflatable. Options are available for branding to be applied direct to the inflatable or produced on a removable badge. Removable badges bond to the inflatable using a strong hook and loop Velcro.

Contact our sales team to discuss your printing options.
