

MARLIN

OPEN WATER SWIMMING CAP

Beat the brain-freeze and keep your head in the game.

The Marlin 3.0mm Thermal Neoprene Swim Cap is designed to keep your head and ears warmer during cold-water swimming, diving and other open water adventures. Made from high-quality 3.0mm neoprene, it provides reliable insulation while maintaining a close-fitting, low-drag profile for comfortable movement through the water.

The adjustable Velcro chin strap allows you to achieve a secure, personalised fit, while glued and blind-stitched seams provide a durable, comfortable construction. Available in S, M and L, the cap is suitable for a wide range of head sizes.

Visibility is also built in. The Marlin is available in high-visibility yellow, pink and blue and features a 10mm elastic light-stick loop at the rear, designed to hold a Flexi-Light Stick for additional visibility during early-morning, evening or low-light swims.

Ideal for open water swimmers, divers and snorkellers, the Marlin is a simple and effective way to add warmth, comfort and visibility to your cold-water kit.

FEATURES

- 3.0mm high quality neoprene
- Glued and blind stitched seams
- Smooth-skin outer side panels
- Close-fitting, protective fit
- 10mm (0.4") elastic light stick loop on the back of the head
