

MARLIN TOW FLOAT SWIM BAG

The Marlin Tow Float is a bright, high-visibility swimming buoy and waterproof 22-litre dry bag, designed to improve visibility, provide added buoyancy and keep your essentials safely stored while swimming.

Its inflatable air chamber offers a buoyant float to hold onto when you need a rest, while the adjustable leash and waist belt ensure comfortable, low-drag towing behind you. Please note, it is not a dedicated rescue or safety device.

The waterproof PVC construction, welded seams and roll-top closure protect clothing, keys, phones and other essentials from water. A bright orange finish helps you stand out to other water users, while the included 100+ dB safety whistle provides an additional way to attract attention in an emergency.

Lightweight and easy to transport, the Marlin packs down to just 20 × 14cm when deflated, making it ideal for swim bags, cars and travel.

TECHNICAL SPECIFICATION

Capacity: 22L
Inflated size: 55 × 20 × 20cm
Deflated size: 33 × 65cm
Packed size: 20 × 14cm
Waist belt: 76–136cm
