

MTP GLOVES

The MTP gloves are precision-engineered for professional diving and tactical operations. Constructed from 5mm super-stretch neoprene, these gloves provide excellent thermal protection while maintaining dexterity, tactile sensitivity, and a low-profile fit.

They are ideal for multi-terrain operations and watersport activities where performance, reliability, and camouflage are essential.

KEY FEATURES

- 5mm superstretch neoprene for optimum flexibility, insulation, and comfort.
- Low-profile, form-fitting construction to maximize dexterity and control of equipment.
- Reinforced stitching and high-quality neoprene ensure long-term resistance to wear, abrasion, and environmental exposure.
- Suitable for military diving, tactical waterborne operations, and professional watersport environments.
- Ergonomically designed for a snug fit without restricting movement or grip.
- Maintains hand warmth in cold-water conditions without bulk.

SIZES

S, M, L, XL, XXL

COLOUR

Standard Multi-Terrain Pattern (MTP); other patterns available upon request for mission-specific requirements.
