

NORTHERN DIVER

MINE WARFARE & MILITARY DIVING SPECIALISTS

NPS - NAVIGATION PLATFORM

The Northern Diver Navigation Platform (NPS) has been designed as a versatile navigation solution for professional and military divers. Our compact swim board platform houses the SUUNTO SK8, which is the world's most popular and extremely accurate dive compass combined with a back light to illuminate underwater that is available in 5 colour choices. A simple lanyard is attached to the platform.

Instrument accessories that can be mounted onto the platform include analogue depth gauge, CASIO G-Shock and digital depth gauge that displays current depth, max depth, dive duration and exceeding maximum depth.
