

# POUCH WEIGHT BELT

The Northern Diver Pouch Weight Belt offers a safer, more comfortable alternative to traditional weight belts. Designed to minimise accidental weight loss, this innovative system features fixed weight pouches, a high-grip stainless steel buckle and a rubberised inner lining that helps prevent the belt from slipping during use. This product tackles the issues of loose fitting belts and unexpected shift of weights, this belt reduces these risks whilst incorporating comfort and weight distribution.

The design's increased contact area around the waist, reduces pressure points and enhancing comfort during long dives. Individual weights are held inside dedicated fixed pockets, helping to reduce snagging and improving security. Each pouch also includes a removable mesh bag, allowing divers to use lead shot instead of conventional weight blocks if preferred. The durable construction of this weighted belt includes strong Velcro closures, drainage holes and a solid stainless steel belt buckle for long-lasting performance in harsh marine environments.

## FEATURES

- Wider profile for superior comfort.
- Rubberised inner surface resists slipping.
- High-grip stainless steel buckle for added security.
- Fixed weight pouches reduce snagging risks.
- Strong Velcro closures keep weights securely in place.
- Removable mesh bags allow the use of lead shot.
- Drain holes enable rapid water evacuation .
- Available in M, L, XL sizes for use over drysuits.
- Supports up to 2-3kg of lead shot per pocket of 1kg lead coated weight.
- Ideal for recreational, technical and professional divers.

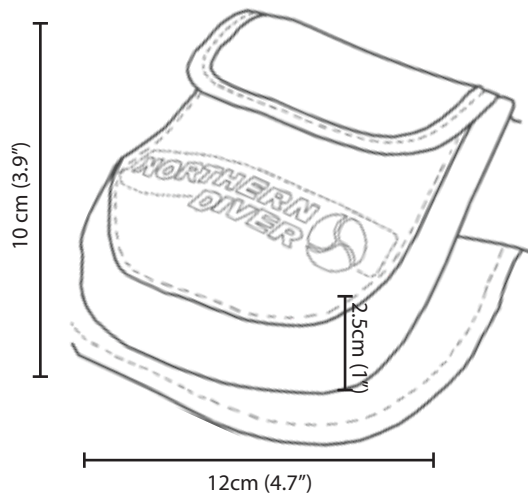

## SIZES

- M - 71.1 - 96.5cm (28 - 38")
- L - 91.4 - 132.1cm (36 - 52")
- XL - 121.9 - 157.5cm (48 - 62")

Compatible with both lead shot and lead weight (sold separately).
