

QUICK RELEASE MOUTHPIECE

Designed for demanding underwater environments, the Quick Release Regulator Retaining Strap provides secure, comfortable regulator retention for commercial, military, rescue and recreational diving.

Unlike traditional regulator necklaces, its large quick-release buckles allow the regulator to be detached quickly in an emergency, by either the diver or a buddy.

A soft medical-grade silicone mouthpiece provides comfort during extended dives, while adjustable ridged straps ensure a secure, personalised fit. Integrated strap keepers help manage excess strap length and reduce snag hazards.

Combining secure regulator retention with rapid emergency release, the Northern Diver Quick Release Regulator Retaining Strap provides added confidence without compromising accessibility.

KEY FEATURES

- Emergency Quick Release
- Secure regulator retention
- Soft silicone mouthpiece
- Comfortable during extended dives
- Adjustable ridged straps
- Quick-adjust strap clips
- Functions as a regular necklace
- Strap retaining bands for a tidy fit
- Fits most standard second-stage regulators
- Suitable for commercial, military, rescue and recreational diving
- Size of mouthpiece: 45mm (1.8")
