RED 4-WINDOW DIVE MASK

The Northern Diver Four Window Dive Mask is designed to deliver exceptional underwater visibility, comfort and reliability. Featuring a unique twin split lens design and four-window construction, it provides an enhanced panoramic field of vision, helping divers maintain greater awareness of their surroundings underwater.

Built for performance in demanding conditions, the mask features durable tempered glass lenses for excellent optical clarity and a soft, flexible silicone skirt for a comfortable, secure fit. Finished in red, it offers a distinctive look while delivering dependable performance for recreational scuba diving, rescue operations and professional underwater use.
