

SN1030 MILITARY SNORKEL

The SN1030 Snakehead Military Snorkel is a durable, low-profile snorkel designed for demanding diving and watersports environments. Finished in tactical black, the streamlined design offers a discreet appearance while delivering reliable in-water performance and comfort.

Featuring a baffled splash guard, the snorkel helps reduce water ingress from waves and surface spray, allowing for easier breathing in rougher conditions. The drop-away non-return purge valve enables quick and efficient clearing of water, while the flexible lower tube provides a comfortable and natural fit during use.

A replaceable mouthpiece ensures long-lasting comfort and simple maintenance, making the snorkel suitable for frequent recreational, professional and military-style applications. Built for practicality and durability, the SN1030 Military Snorkel is ideal for divers who require dependable performance in challenging environments.
