

1.7M (5'6)

TELESCOPIC WADING POLE

Our rescue wading poles are compact, robust and lightweight. Produced to the highest standard and sealed with a protective coating to protect against the elements.

The base of our wading poles are fitted with a weighted non-slip foot which is designed to provide good grip in the water.

Our Telescopic Wading Pole has been designed to float and is adjustable to suit any height.

All poles can be customised with markers upon request (white, colour or reflective). Please enquire for details.

Fully extended length: 1.7m (5'6)

Retracted length: 1.5m (4'9)

Lower hand grip (300mm / 11"8 length)

T-bar top handle
