

TROPICAL POOL FINS

Pool Fins are designed for reliable all-round performance across a wide range of users, from military and professional operators through to sport, training, and recreational divers. Built for comfort, durability, and efficient propulsion, they deliver consistent performance.

The full foot pocket is constructed from soft TPR to provide a secure yet comfortable fit for extended use, while the integrated anti-slip sole enhances safety when moving on wet surfaces, such as poolside environments and training facilities.

A flexible centre channel allows each blade to operate independently, improving thrust efficiency and reducing fatigue during repetitive finning. This design promotes smooth, controlled movement and effective propulsion with reduced effort.

Integrated water venting channels help reduce resistance by accelerating water flow through the blade structure, easing strain on the legs and improving overall efficiency during prolonged use.

KEY FEATURES

- Suitable for military, professional, sport, and recreational use
- Soft TPR full foot pocket for comfort and secure fit
- Anti-slip sole for improved safety on wet surfaces
- Flexible centre channel for independent blade movement
- Efficient propulsion
- Water venting system to reduce drag

COLOURS

Black, Blue

SIZES

- (S) – UK 5–7 / EU 38–41 / US 6–8
- (M) – UK 7–9 / EU 40–43 / US 8–10
- (L) – UK 9–11 / EU 43–45 / US 10–12
- (XL) – UK 11–13 / EU 45–47 / US 12–14

DESCRIPTION

DIVING FIN
