

TAC-100A

Diver Navigation Board

The TAC-100A Diver Navigation Board is a rugged, lightweight navigation platform used by professional divers worldwide. It combines an underwater compass, analogue depth gauge and dive chronometer on a durable black ABS console.

The compass features luminous bearing markings and adjustable chem light illumination for low-light operations. Supplied complete with a carrying bag and available with Imperial or Metric depth gauge.

FEATURES

Rugged black ABS construction
5° compass bearing markings
Luminous compass card with adjustable chem light
20° compass card tilt
Analogue depth gauge: 0–80 ft / 0–25 m
