HOSE RETAINING CLIP (HC362)

Keep your diving equipment streamlined and within easy reach with the Northern Diver Twin Hose Retaining Clip with D-Ring. Designed to securely hold two low-pressure hoses against your BCD, this practical accessory helps prevent hoses from dangling, snagging or becoming damaged during a dive.

The simple snap-fit design allows hoses to be clipped in and removed quickly, while providing a secure hold throughout the dive. Ideal for routing octopus regulators, pressure gauges or inflator hoses, the clip helps improve equipment organisation and reduces unnecessary drag underwater.

An integrated plastic D-ring provides a convenient attachment point for additional accessories such as clips, lanyards or lightweight equipment, helping you keep essential gear close at hand.

Manufactured from durable, lightweight plastic, the Twin Hose Retaining Clip is suitable for recreational, technical and commercial diving applications, making it an essential addition to any diver's equipment setup.

KEY FEATURES

Securely holds two low-pressure hoses
Compatible with standard 15mm hoses
Quick snap-fit design
Streamlines your equipment
Helps reduce snagging
Integrated D-ring
Versatile hose management
Lightweight and durable construction
Direct BCD attachment
Suitable for multiple diving applications
