

15M (49') TO 30M (98')

THROW LINE BULLET BAG WITH REFLECTIVE

Bullet Bags contain a length of specialist rope and can be thrown out to an in-water casualty so that they can be pulled to safety if they are conscious and able to assist.

Useful in swift water rescue situations as they can be thrown into the water ahead of the moving casualty. The bags are often attached to the rescuer's personal protective equipment for quick access.

Available with 15m (49'), 20m (65'), 25m (82') & 30m (98') rope lengths, these bullet bags feature a reflective floating safety line that has a continuous stranded polypropylene core which provides flotation to the wear-resistant braided nylon sheath as well as reflective bands on the outside of the bag, making it particularly useful in poor visibility/at night.

All the sizes of our bullet bags are supplied complete with the nylon webbing guide belt (also available to buy separately), for use with the integrated guide belt webbing loops on the bags.

8mm (0.3") reflective technical floating polypropylene line:

Load tested to 900kg (1984lb)
High resistance to rotting/ mildew
Braided sheath over the main load bearing core, sheath provides up to 25% of rope strength, absorbs most abrasion and protects the load-bearing core

Bullet Bag:

Ripstop Cordura® nylon
Drawstring neck closure
Mesh draining base
Rapid drying time
High visibility reflective bands
Great for use at night
Quick-clip attachment point

15m (49')
L*D: 27*11cm (10.6*4.3")
Weight: 0.7kg (1.54lb)

20m (65')
L*D: 35*11cm (13.8*4.3")
Weight: 0.9kg (1.98lb)

25m (82')
L*D: 38cm (14.9*4.3")
Weight: 1.1kg (2.42lb)

30m (98')
L*D: 40cm (15.7*4.3")
Weight: 1.2kg (2.64lb)

Conforms to the health and safety requirements stated in Annex II of the PPE Directive 89/686/EEC
