

SAFETY WELLINGTON

This comfortable safety toecap and midsole wellington meets the highest requirements for slip resistance, with an SRC rating. Created from a supple compound of PVC and nitrile rubber, the wellington has resistance to many contaminants and is also anti-static and hydrocarbon resistant. It features an air exchange channel to regulate temperature, and a padded footbed laid over a shock absorbing honeycomb heel section for day long comfort. They are reinforced over the toe area and under the arch of the foot for durability.

CE Specification

EN ISO 20345:2011 S5 SRC

Size

UK 3 - 13 (EU 36 - 47)

Upper

Black PVC and nitrile rubber upper, with a moulded heel stabiliser and internal trouser grips. Cutdown bands enable it to be resized. Resistant to hydrocarbons.
