

HOTWATER WETSUIT

This 2mm super-stretch neoprene wetsuit is suitable for warmer diving environments.

It is also used as an undersuit by commercial divers wearing hot water suits at great depths.

Many divers are now using the Hotwater wetsuit as an additional layer of insulation beneath their drysuits.

This has proved useful for those who want to perform deeper dives or dive in colder waters.

- 2mm super-stretch neoprene
- All black
- Subtle Hotwater logo
- Triple glued, blind stitched seams
- YKK zip at front with protective cover and securing Velcro flap

Sizes available: S, M, L, XL, XXL

**Printing may vary dependant on size ordered*
