

V4 DRY GLOVE RING SYSTEM

Loss of movement or manual dexterity, due to cold hands, can be dangerous during a dive, as well as being uncomfortable for the diver. Maintaining hand warmth and a divers ability to efficiently operate their essential diving equipment, is vital to safe diving and maintaining a high level of dive comfort. Northern Diver are proud to manufacture and continue to innovate our revolutionary concept in dry diving glove systems.

Compatible with neoprene or membrane drysuits, using latex or neoprene wrist seals. Once fitted to a divers suit, the unique twin-safe locking ring mechanism, allows quick and easy glove engagement and the equally quick release of the dry gloves, without the need for assistance.

Ansell Extra™ glove

Extremely high resistance to many ketones, salts, detergents, alcohols, alkalis and fats 100% cotton flock lining provides a softer more comfortable glove that helps absorb perspiration

100% natural rubber with no filters
Excellent resistance to mechanical hazards plus increased chemical protection Chlorinated for better grip and increased chemical resistance
Heavy duty handling where sensitivity is also required

Thermal fleece inner glove

Thermal 4-way stretch fleece
Flat lock stitched seams for comfort
Snug fit around wrist area for additional thermal protection
Removable for warmer waters or for use post dive.

SIZE: S, M, L, XL

Suitable for both arctic conditions & contaminated water environments.

Fitting this dry glove system to your own drysuit is easy, as the package includes the unique bespoke fitting tool, sealing adhesive and a sealing adhesive application brush.

Gloves conform to the requirements of European Directive 89/686/EEC and to the European standards EN420:2003 + A1:2009 and EN374:2003, EN388:2003.
